There are a lot of other filters we can apply to the data depending on what you would like to know. We will definitely be able to see which Social Care studies are open across London, how many people are taking part in those studies and exactly where the studies are open (e.g. which particular care homes.)

25-Sep-24	Policies and Procedures	Lizzie – has event on 28-Nov-24 – policies and procedures – 4 key workstreams, having an event where they will invite all CHC Assessors. Had presentation at chief nursing event – presented the money behind social care contracts. Breakdown of costs in social care. What does the quality look like if we are not meeting that. Nuno- Weekly losses - service users from local authority. They may get additional funding if no one else is able to look after them. If asking provider to deliver care based on money they are receiving you will get less staff etc. Data from ambulance service important. If you have good care home with right quality of staff, then you reduce the chance of needing an ambulance. Louise – What people don't see is quality of food, quality of choice of food, soap powder, quality of furnishing – how often they refurb. If we start to map it you would see this.	Nuno – Dr Stephen Allen – Kent University. Correlated staff pay with quality of care. Seen a direct correlation. Nuno will send Lizzie the link.	Lizzie/Nuno

25-Sep-24	Universities in London	How many are doing nursing/disability training, how many universities exist - and how many are offering social care placements. What is the percentage that will have a social care experience based on data between unis? More beneficial to have placement in adult social care first, then when they meet patients in hospital/acute care they will advocate for them and understand their needs.	Collect data. PLPLG - Pam is part of. Is attending a meeting, and can ask these questions. Nuno and Louise also happy to help on this	Pam Hodge
